

“PIPELESS” TYPE DOCTOR BLADES

Improve and update your flexographic printing with our *new technology* in the inking system

What does it contribute to you?

Improve the printing quality

- ✔ Greater rigidity.
- ✔ Asymmetric ink chambers that have an optimum contact angle with the anilox.
- ✔ Low-friction, low pressure pistons that track the movement of the anilox.
- ✔ More reinforced ink chamber cap.

Ergonomics and Fast change (chamber doctor blade)

- ✔ No need to remove pipes
- ✔ Ink chambers that are 6 kg lighter, with the option of having 2 new replacement chambers.
- ✔ Magnetic blade changing system.
- ✔ Partial replacement of the flexible connection with a rigid tube.

Increased productivity

- ✔ Reduced changeover time. Higher
- ✔ Printing speed.
- ✔ It is a more stable system and it works better with impact jobs.
- ✔ Magnetic blade changing system: prevents spillages and reduces time dedicated to cleaning.
- ✔ Increased blade lifespan. Machine stops are reduced and the printing speed increased.
**updates available for previous FI, FPlus and FW models.*
